How to create the perfect canvas print.

As all our canvas prints are hand finished, 60 mm of the content around the edge of the image is required to wrap the canvas around the frame. When planning a photograph for a canvas print it is important to make sure the composition is well within the centre of the image. If you wish to use an existing photo that might lose content by being wrapped, we can print it with a white border or we can alter the image so it wraps around the frame edge and maintains the image integrity (a small charge may apply).

poster sized prints
